GULFBREEZE MOMENTS N COLOR

registered name

POODLE

breed

981020005700193

tattoo/microchip/DNA profile

1526975

application number

7/6/2012

date of report

RESULTS:

Based on the samples submitted, no evidence of Sebaceous Adenitis (SA) was found and the dog is phenotypically normal at this time. Normal results do not imply that the dog is genetically normal, only that there was no evidence of SA in the samples at this point in time. Retesting is recommended every one to two years for dogs used for breeding.
