age at evaluation in months

PO-SA4881/32F-VPI

O.F.A. NUMBER

This number is used with the right to correct or revoke by the Orthopedic Foundation for Animals.

A Not-For-Profit Organization

RESULTS:

Based on the samples submitted, no evidence of Sebaceous Adenitis (SA) was found and the dog is phenotypically normal at this time. Normal results do not imply that the dog is genetically normal, only that there was no evidence of SA in the samples at this point in time. Retesting is recommended every one to two years for dogs used for breeding.
